Legends Drive Construction

Dear Owners:

We are in constant contact with the County Engineer on the construction of Legends Drive. They are aware of the traffic delays that occurred today (Monday), and are working with the contractor to minimize the impact of delays during road construction. However, between now and the middle of June please be advised that you may see delays of 15 minutes or so depending on the work being accomplished on the road. Please be patient, by the end of June we will have a County owned reconstructed roadway.

Thank you
